Program Objective

The aim of this program is to provide students with a combination of computer and office administration skills and a practical foundation in communications marketing and e-commerce. The program would also provide in-depth knowledge in business analysis and documentation processes.

This diploma program reflects the fast changing needs of the internet world. Besides teaching the fundamentals of e-commerce and understanding the advance computer concepts and practical use of the computer, the students will also evaluate the efficiency and efficacy of the use of e-commerce in business. It will also provide a framework for analysis and formulation of e-commerce solutions. Students will also learn to design multimedia applications.

ERP Programs:

This Diploma program also offers integrated training on any 2 modules of ERP programs wherein you are provided with Training, Projects case study, System access and Test/Certification
